Complete the table below. Write NO MORE THAN TWO WORDS AND/OR A NUMBER for each answer.

(27) .................       (28) .................
(29) .................       (30) .................

Part 4: Questions 31-37
Complete the summary below. Write NO MORE THAN TWO WORDS for each answer.

Everyday the human body is fighting off (31) ................. by destructive pathogens. A person in good health has natural protection in the form of an immune system which works best against familiar microorganisms which may have been encountered during a previous (32) ................. or passed on by the mother before or after birth.

Vaccination is a way to cause (33) ................. immunization by introducing a small amount of pathogen into the body – just enough for the body’s (34) ................. to react by making antibodies. Passive immunization can be used
as a way of treating someone who is already sick. Proteins from animal (35) are introduced into the patient to give him the necessary antibodies to fight the disease.

Dr. Edward Jenner observed that people who had suffered and recovered from a serious disease called smallpox did not get it again. He also noted that victims of milder disease, cowpox which they caught from (36) were immune to smallpox. He carried out a successful (37) by deliberately giving a child cowpox in order to make him immune to smallpox.
